

Quorum: State Legislative Tracking Program

In partnership with the Council of State Governments, the National Office is leveraging the legislative database Quorum to monitor state legislation. To keep Commission members informed, we've developed an interactive map that highlights pending bills referencing the Interstate Compact on Educational Opportunity for Military Children or related terms such as "education" and/or "military children."

The map displays bills flagged in the system. While we strive to identify all relevant legislation, we encourage members to continue engaging with their state Department of Education liaison or the legislative representatives serving on your state councils to stay fully informed about legislation impacting education and military children in your state.

How to Use the Map: Click on your state to view flagged bills. Purple states indicate legislation currently pending before the state legislature. Gray states indicate no pending legislation at this time. The map updates automatically as new bills are flagged or as legislation progresses.
